GENE MATHEW D. WAGAS

WEB DEVELOPER | IT SPECIALIST | TECHNICAL SUPPORT ENGINEER | CUSTOMER SERVICE

09763331768 | genemathew232@gmail.com | genemw.vercel.app

I build websites and systems that make work easier and I genuinely enjoy doing it. From writing clean functional code to solving IT issues, I bring full dedication to every task. I pick up new technologies quickly, adapt to different environments, and always deliver with honesty and professionalism.

AREA OF EXPERTISE

Web Design and Development	UI/UX Design and Prototyping	Technical IT Support
Database Management	Responsive Design	Network Configuration
System Troubleshooting	Digital Content Creation	Social Media Management
API Integration	Wireframe Creation	Documentation and Reporting

KEY ACHIEVEMENTS

- **Full IT and Web Ownership.** Handled end-to-end IT operations and full-stack web development at NCLEX Amplified Review Center covering websites, dashboards, infrastructure, digital tools, and team management simultaneously.
- **Full-Stack Delivery.** Designed, built, and deployed production-ready web apps using React, PHP, MySQL, and Supabase covering front-end, back-end, UI/UX design, and live deployment.
- **Customer Service Excellence.** Handled high-volume customer support at Concentrix Ticketmaster LOB consistently meeting resolution and quality targets.
- **Digital Presence Management.** Managed company social media pages, created marketing materials, and aligned content to brand strategy.

PROFESSIONAL EXPERIENCE

Web Developer / IT Specialist **Jan 2025 – Jan 2026**

NCLEX Amplified Review Center | OMV Bldg., Avenida Rizal St., Moino V, Bacor City

- Developed and maintained company websites and dashboards using React, Tailwind CSS, PHP, and MySQL.
- Built responsive front-end interfaces and managed back-end logic, database connections via Supabase and MySQL, and API integrations.
- Created UI/UX wireframes in Figma and applied brand-consistent visuals across all platforms.
- Optimized website speed and cross-device responsiveness and deployed applications via Vercel, Hostinger, and Netlify.
- Provided technical support for staff and students covering system issues, dashboards, and e-learning platforms.
- Configured and maintained computers, CCTV, cabling, and network infrastructure and managed IT asset inventory and data security.
- Handled virus removal, system updates, hardware upgrades, and managed digital tools including Zoom, Thinkific, and Google Drive.
- Served as Zoom Moderator and managed Discord and Facebook servers for moderation and user verification.
- Handled digital marketing by designing graphics, editing videos, and scheduling posts aligned to brand strategy. Led the IT and Web Development team and submitted daily and monthly reports to management.

Customer Service Representative **Jan 2023 – Jan 2025**

Concentrix | Ticketmaster LOB | Julia Vargas Ave., Ortigas Center, Mandaluyong

- Handled customer inquiries via phone, email, and live chat and assisted with ticket bookings and issue resolution.
- Followed structured call flow processes and maintained accurate CRM records and documentation.
- Consistently demonstrated strong communication, problem-solving, and teamwork skills in a fast-paced environment.

Service Crew **Jan 2023 – Jan 2024**

McDonald's | San Dionisio, Paranaque, Metro Manila

- Handled lobby, kitchen, and delivery operations and assisted in organizing in-store birthday events.
- Maintained food safety and cleanliness standards and delivered excellent customer service.

WEB DEVELOPMENT PROCESS

This is how I work. Not just what I know, but how I actually get things done.

1. **Understand and Plan:** I ask the right questions first. What is the goal, who are the users, and what does it need to do. I do not write a single line of code until I fully understand what I am building and why.
2. **Design and Wireframe:** I design everything in Figma before coding. I map out the layout, user flow, and visual structure to avoid surprises during development.
3. **Develop: I** write clean and organized code covering React components, PHP logic, MySQL queries, and API connections so it is easy to maintain or hand off.
4. **Test and Debug:** I test on different devices and browsers, fix bugs, and check performance before anything goes live.
5. **Deploy:** I deploy through Vercel, Hostinger, or Netlify and monitor it after launch to make sure everything runs smoothly.
6. **Document and Report:** I document all changes, issues, and decisions and submit reports so nothing gets lost and the team stays aligned.

OJT EXPERIENCE

IT Support Intern **Apr 2024 – Jun 2024**

Straive

- Diagnosed and repaired hardware and software problems and resolved network and connectivity issues.
- Installed and configured hardware and software and tracked IP addresses and performed network tracing.
